

CONTRACTOR FROM ALBUQUERQUE AT WORK IN NEEDLES

Anson Constructing New Recreation Building.

WILL BE COMPLETED BY THE EARLY SPRING OF 1936

Contractor A. W. Anson of Albuquerque has had a large force of men at work upon the foundation work of the new Recreation building being built by the Santa Fe. Says the Needles, California, Eye. Scarcely four weeks ago a move was made to purchase the property in block 8. Now, nearly all the buildings upon the block have been moved and the contractor is rapidly putting in the foundations. Materials have been arriving daily and being unloaded. Mr. Anson has built an office near the location and is upon the ground looking after the work. The contract calls for the completion of the building not later than May 1, 1936, and this early date means that the contractor will necessarily have but little time to lose and cannot meet with many delays in the construction work. Considerable newspaper talk has been made of this building, yet many of the people of Needles thought it but the talk of the gossip. There is a class of people who look upon the promises of the railroad company with but little faith but that doubt must now be removed from their reluctant brains.

Brakeman seriously injured.
Yesterday forenoon Harry E. Neil, a yard switchman employed in the local yards, while attempting to make a coupling, was caught between the dead ends and seriously injured about the breast, says the Needles Eye. The cars when they first struck fell to the ground, and Mr. Neil gave a signal to go ahead that he might have room to step in and fix the drawbars and knuckles which had failed to make the coupling, but before the engine started the slack ran back and he was caught between the cars. He was immediately taken to the local hospital, where Dr. Freeman made an examination and dressed the wounds. A rib had evidently entered the left lung but the hemorrhage was very little and it was thought last evening that the injured man would recover. Dr. Freeman last evening accompanied the patient to Los Angeles.

Passenger Equipment Arriving.
The Santa Fe's new passenger equipment is now being received and is being put in commission as soon as ready and it is expected that a goodly part of the seventy-five new coaches will be on hand and in service by the middle of next month. This equipment is the finest that could be found and will make traveling over the Santa Fe comfortable, safe and pleasant. Even the second-class coaches, and the smoking cars are being built with steel frames, thus making them of the kind that cannot be telescoped.

Trainmen's Home May Fall Down.
From reports that are being received at the national offices of the Brotherhood of Railway Trainmen in Cleveland the project of the trainmen establishing a home will not carry. The returns are just beginning to come in from the lodges of which there are over 700 in the country and the vote seems to be about divided on the proposition. It will be necessary for a two-thirds vote to carry the proposition.

The matter of establishing a home for the members of the Brotherhood is one which has been agitated for several years and at the last convention it was decided to appoint a committee to take up the matter. The committee was appointed and returned several weeks ago from the west, where it looked over different locations. Sites were offered to the Brotherhood for such a home in a couple of Colorado places. When the committee returned from the west it was decided to have a referendum vote on the matter by the different lodges. The only proposition which the lodges were asked to vote on was whether or not such a home should be established. The erection of such a home as would be considered by the trainmen would cost a large sum of money and many of the lodges think that the step should not be taken at the present time.

MESSAGERS LEARN TO SHOOT.
United States Express Company Provides Practice for Trainmen Who Guard Its Property.

Chicago, Dec. 12.—To enable its messengers to make effective resistance when attacked the United States Express company has established a school of pistol practice at its branch depot in Washington street. In a large basement all the messengers who work on trains running into Chicago are required as part of their duties to take part in the practice at least four times a month.

With regulation 38-caliber revolvers the 150 messengers who make Chicago their headquarters spend an hour of each week shooting at a distance of sixty feet at a life-sized steel target shaped like a man. The scores which they make are carefully recorded and sent to the superintendent of the company. Most of the men have become very good marksmen, many often making 48 out of a possible 50.
